

Re-Activating Your Accounts on Quicken*

**While these instructions reference Quicken, the steps can also be applied to QuickBooks.*

At www.JustCallHome.com

If you have already logged in to the new online banking you may skip to [Step 08](#).

1. Select **New Online Banking** from the drop down menu on the left hand side of the screen. Select **Login**
2. Type in your **User ID** and your **password**. Select **Login**.
3. Select a method to deliver your **Secure Access Code**, the secure access code is a temporary 6 digit security code that you will enter when you login to an unrecognized browser or device.
This is not to replace your user ID. You do not need to save this code. If there are no methods available to you, contact the bank for assistance.
4. Then you will select if you would like to **register your device**
Registering your device will reduce the number of times that you need to use a secure access code to access your online banking.
5. The first time that you log in you will be prompted to **change your password**. Enter your current password and then create a new password in the next two fields. Once all requirements are met, select **Submit**.
Any password requirements that are not met by the new password will show in red text until corrected.
6. The first time that you log in a page will display with your profile information but will not allow you to edit any information. Select **Submit**.
If this information is incorrect or out of date – please contact your local branch to update your information.
7. The Online Access Agreement and Disclosure Statement will appear the first time that you log in. You will need to review the **terms and conditions** before you can access your online banking. Scroll down to the bottom of the page and select **I accept** to finish the first time login process.

In Quicken

8. On or after **March 7** choose the **Tools** menu and select **Account List**.
